Operations Roadmap

Statement in Favor:

      The aim of this initiative is to make it the policy of RChain Cooperative to maintain an organizational / operations roadmap to make clear the milestones in the development of (a) the organization itself, particularly with respect to its business plan, e.g. staking the network; (b) expansion and communication through regional initiatives or cooperatives, e.g. RChain Asia; and (c) efforts to define and execute cooperative decision making and governance, e.g. voting systems. Currently Coop members participating in the bounty system or interested in contributing to the development of the Coop under an SOW sometimes struggle to know what kind of work will be valued by the Coop. Those who would like to purchase RHOCs in order to serve as validators will have a financial interest in the longevity and success of the Coop.

Proposed Solution:

      RChain Cooperative will release an operational roadmap and present its latest incarnation at the Annual Member Meeting, each RCon, and any other similar gathering.

For pasting into the IoB channel on Discord:
